

**RECORD OF ADMINISTRATION OF MEDICATIONS FROM
THE FEI PROHIBITED SUBSTANCES LIST**

THE MEDICATION LOG BOOK

NAME OF HORSE _____

FEI PASSPORT NO _____

UELN NO _____

DATE LOG BOOK STARTED _____

The purpose of this Medication Log Book is to serve as a record of each and every medication given to the horse from the FEI Prohibited Substances List (this is **required** from 5th April 2010 under FEI Equine Anti Doping and Medication Control Regulations). The Log Book will enable the FEI to have a check of what is administered to the horse if ever required. This information may also be required by the FEI in the case of an alleged violation of FEI Anti Doping and Medication Control Rules.

Whilst it is only required that substances from the FEI Prohibited Substance List are recorded, it is strongly recommended that all medications are recorded.

The FEI can only demand access to this Log Book if there is an alleged violation of FEI Anti Doping and Medication Control Regulations. However, it may assist FEI Veterinary Delegates to approve the use of medications during competitions if they are able to see what medications the horse has received prior to competition. Therefore it may be beneficial for the Log Book to travel to competitions with the horse. The FEI cannot demand to see it at competitions.

Further information can be found at <http://www.feicleansport.org/>

Note: If the active substance is not known it is suggested that the trade name of the treatment is recorded.
